COMPANY PROFILE:

The Asia Pacific Leaders Malaria Alliance (“APLMA”) unites 22 governments in Asia-Pacific who have committed to eliminating malaria in the region by 2030. APLMA translates evidence to advocate for policy change at the highest levels of government and supports leadership collaboration across the region. By convening senior officials beyond health, evidence monitoring and reporting on progress and bottlenecks and facilitating cross-border collaboration, APLMA supports and provides governments and political leaders access to regional and national insights, as well as visibility on the game-changing approaches and tools they need to end malaria.

The APLMA Leaders’ Dashboard is a tool developed together with Asia Pacific representatives in 2017 to monitor progress against the six Leaders’ Roadmap priorities. The Dashboard serves as a mechanism to review policy progress to elimination. The Technical Annex to the Dashboard summarizes epidemiological data from the WHO World Malaria Report for the 22 countries of the region. The Leaders’ Dashboard provides a snapshot of the region and individual countries’ progress over the years and is an opportunity to highlight remaining policy bottlenecks.

ROLE:

The Data Insights Analyst will play a key role within the Data Insights Team, supporting the team in gathering, analysing, and interpreting data to generate actionable strategic insights to inform policy and program development. The Analyst will be responsible for generating strategic insights and recommendations that will inform the development and maintenance of the Data Portal. The Data Portal is a centralized platform for accessing and analysing data related to malaria control and elimination efforts. The portal will provide stakeholders with user-friendly and interactive tools to explore, visualize, and derive insights from diverse datasets, enabling evidence-based decision-making and fostering collaboration among key stakeholders. The portal will incorporate the APLMA’s Leaders Dashboard.

As a Data Insights Analyst, you will collaborate with cross-functional teams and stakeholders to ensure the portal meets the data needs of APLMA and its partners in the context of malaria control and elimination efforts in the Asia Pacific.

RESPONSIBILITIES:

- Support the design and development of the APLMA Data Portal, ensuring it provides user-friendly and interactive data visualization tools, dashboards, graphs and maps.
Collaborate with technical experts and stakeholders to identify data requirements and ensure the portal aligns with the needs of policy development and evidence-based program investments.

Synthesize complex data sets into clear and actionable insights, and develop reports, presentations, and visualizations to effectively communicate findings to stakeholders.

Contribute to the integration of insights generated from the portal into strategic planning processes, policy development, and programmatic decision-making.

Gather, organise and analyse relevant data from various sources, including mid-term review reports, research studies, programmatic data as shared by Govt. partners to APLMA, and other datasets related to malaria control and elimination in Asia Pacific.

Provide briefing and data analysis support to APLMA’s Executive Leadership Team.

**REQUIREMENTS:**

**Qualifications**

- A good university degree in data science, analytics, public health or a related field.
- Postgraduate diploma or Master’s degree holder in related field will be preferred.

**Experience**

- Minimum 3-5 years of experience in data analysis, data visualization, or business intelligence roles, preferably in the context of public health / public sector consulting or market research.
- Proficient and experienced in using data analysis tools and software, such as Tableau, PowerBI or other data visualization platforms.
- Prior experience and proven abilities in translating data into meaningful insights for decision-making.

**Knowledge and Skills**

- Strong analytical skills, including the ability to conduct policy analysis, develop evidence-based policy recommendations, and communicate complex policy issues to diverse audiences.
- Strong problem solving skills.
- Excellent written and oral communication skills in English.
- Proficiency in additional languages spoken in Asia Pacific is desirable.
Personal Attributes

- Demonstrated commitment to improving public health outcomes and preventing the spread of communicable disease threats, particularly in underserved and marginalized populations.
- Proven ability to work effectively in a multi-cultural and diverse team.
- Able to travel overseas when required.

The position is a full-time role and will be based in the organization’s headquarters in Singapore. The organization offers a competitive salary and benefits package, commensurate with experience and qualifications. The initial contract will be for a period of 2 years, with the possibility of extension based on performance and availability of funding.

To apply, please send your resume, cover letter and writing sample to recruitment@aplma.org by 30 July 2023. We thank you for your application and regret to inform that only candidates shortlisted for interviews will be contacted.
